

Vikas Kumar

AI/ML Developer | Machine Learning Enthusiast

vk0102103@gmail.com · +91-9473263768 · Rajkot, Gujarat, India · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

Professional Summary

Computer Science Engineering student specializing in AI ML with hands-on experience in Python, data analysis, and machine learning fundamentals. Skilled in Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, and Jupyter Notebook for data preprocessing, visualization, and predictive model development. Developed machine learning and AI-integrated projects including placement prediction using Logistic Regression and smart monitoring systems. Passionate about practical AI applications and actively seeking remote internship opportunities in AI, Machine Learning, and Data Analysis.

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering — AI & ML

2024 – Present

CGPA: 7.9 / 10.0

Marwadi University, Rajkot, Gujarat

Technical Skills

Programming Languages	Python, C, C++, JavaScript
Machine Learning & Data Analysis	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Machine Learning Fundamentals
Development Tools	Jupyter Notebook, Google Colab, Kaggle, VS Code, Git, GitHub
Backend & APIs	REST APIs, API Integration, Real-Time Data Handling
Databases	Firebase, MongoDB

Projects

Krishi Drishti — Smart Agriculture Monitoring System | *Python, Firebase, REST APIs, IoT* | [GitHub](#)

- Developed a smart agriculture platform integrating IoT monitoring, weather updates, and crop protection features for farmers.
- Worked with Firebase and external APIs to display real-time sensor data, weather information, and market insights through responsive dashboards.
- Contributed to smart monitoring features and helped develop AI-integrated farming solutions during the INTELLIFY hackathon.

Placement Prediction using Logistic Regression | *Python, Scikit-learn, Pandas, NumPy, Matplotlib, Jupyter Notebook* | [GitHub](#)

- Developed a machine learning model to predict student placement outcomes using academic performance data.
- Performed data preprocessing, visualization, model training, and prediction using Logistic Regression in Scikit-learn.
- Used Pandas, NumPy, and Matplotlib for data analysis, visualization, and evaluation of model performance.

Professional Experience

PHP Developer Intern (Remote)

Dec 2025 – Feb 2026

Spacece India Foundation

- Developed backend modules using PHP and MySQL for business logic, data processing, and backend integration workflows.
- Built and documented REST APIs enabling efficient frontend-backend communication and real-time data handling.

Achievements

- 2nd Runner-Up** — INTELLIFY 3.0 National Hackathon for AI-integrated Smart Agriculture Project.
- Theme Winner** — Sustain-a-thon 2025 for smart environmental sustainability solution.
- Participated in multiple national-level hackathons focused on AI, IoT, and innovation-based projects.

Certifications

► C++ Programming Certification
Automation Certification

► AI Tools
